Disclaimer

1. The score is an national average, so use **80% of the score** to be on the conservative side i.e. if it says you will get 20 points for one trade line 80% of 20 is 16 points so you can get from 16 – 24 points.
2. 2 out of 100 credit analyzer could be inaccurate. Instead of getting 16 points you could get only 5 or none at all.
